**THE ANNUAL MINIMUM CHARGE
IS 200 € EXCLUDING VAT**

The amount of the eco fee, indicated in € / ton, is unique for each code. It changes according to two modulation criteria, resulting in either an increase (penalty) or a decrease (bonus).

If it is not possible to justify the modulation criteria or if there is any doubt, the least favourable price must be applied.

ECO-FEE MODULATION CRITERIA

2 criteria in the price list table:

Spare parts availability and documentation (bonus)

A bonus is granted for products for which all spare parts are available more than 12 years after the last unit of this model was put on the market, provided that the documentation indicating the procedure for replacing a spare part is available.

Spare parts availability time (penalty)

For each ABJ Th, if the average delivery time for all its spare parts is less than 15 working days, the penalty does not apply. The evaluation is based on all orders for spare parts associated with the product, without distinction of the type of part.

For example, a product A with parts AA, AB, AC and AD will need to calculate the average time taken to receive each part and then calculate a weighted average of all these times, based on the number of parts.

The eco fee amounts change according to these 2 modulation criteria and are indicated in the price list table on each combination line.

NOTICE

For further details, please refer to the "Dedicated note" document available in your personal account on [Ecologic's Producer Extranet](#).

The codes indicated in the "code" column of the tables are those for 2026. They must be taken into account starting January 1st, 2026, for your market placement declarations in 2026.
